

FedEx Tracking Module - Test Strategy Document

This document outlines the comprehensive testing strategy for the FedEx Tracking Module. The strategy focuses on validating shipment tracking functionality, data accuracy, system integration, and end-user experience across the defined testing scope.

Question	Selected Answer
Testing Scope	Functional Testing only
Platform Coverage	Web Application only
Tracking Validation Source	Database records only
Test Environment	UAT (User Acceptance Testing) only
Automation Coverage	Full end-to-end automation for all scenarios

1. Objective

Ensure accurate shipment tracking visibility, validate tracking status updates, verify tracking workflows, and confirm seamless customer experience.

2. Scope of Testing

The strategy includes functional testing of the FedEx web tracking module, tracking status validation, shipment search behavior, tracking number validation, error handling, and end-user navigation.

3. Test Types

- Functional Testing
- UI Validation Testing
- Integration Testing
- Regression Testing
- Smoke Testing
- End-to-End Workflow Validation

4. Test Environment

Testing will be performed primarily in the UAT environment to validate business flows before production deployment.

5. Test Data Strategy

- Valid tracking numbers
- Invalid tracking numbers
- Delivered shipments
- In-transit shipments
- Delayed shipments

- International and domestic shipment data

6. Automation Strategy

Full end-to-end automation coverage is recommended for smoke, regression, and business-critical tracking scenarios using automation frameworks such as Selenium and API automation tools.

7. Entry Criteria

- Requirements approved
- UAT environment available
- Test data prepared
- Application deployment completed

8. Exit Criteria

- All critical defects resolved
- Test execution completed
- Regression suite passed
- Stakeholder sign-off obtained

9. Risk Areas

- Incorrect tracking status synchronization
- Delayed API responses
- Invalid shipment mapping
- UI inconsistencies

10. Deliverables

- Test Strategy Document
- Test Scenarios
- Test Cases
- Defect Reports
- Automation Reports
- Test Summary Report
